iPod NANO

2- and 4GB Pencil-Thin Digital Music/Photo Players

Everything you loved about iPod, but shrunk. With 2GB (500 songs) and 4GB (1,000 songs), the pencil-thin iPod nano packs the entire iPod experience into an impossibly small design. How small? At 0.27" from front to back, the iPod nano is about as deep as six stacked credit cards. Unbelievable? Impossible? Pick it up and hold it in your hand. Take in the brilliant color display. Run your thumb around the Click Wheel. Put on the earbuds and turn up your music.

That's when it becomes clear: It's an iPod.

4GB of skip-free storage on a featherweight iPod means you can wear almost three days' worth of music around your neck. Or jog with 1,000 songs on your arm. It plays for up to 14 hours between battery charges.

It displays the color album art for the song you're listening to right now. It carries your photos, podcasts and audiobooks. It syncs seamlessly with iTunes. It connects to a host of iPod accessories. iPod nano's Click Wheel puts music under your thumb. Click to FF, REW, play, pause or access menus. Use the touch-sensitive surface to control volume or browse music. Do it all without looking. Add accessories via the Dock connector and headphone jack and your music will always keep up with you — at home, on the go, even in your car.

iPod

20- and 60GB Ultra Slim Digital Music/Photo Players

Available in 20GB or 60GB versions, the super-slim iPod continues to redefine what a digital music/photo player should be. It downloads music at blazing speed and can hold up to 15,000 songs, so you can take your entire music collection with you wherever you go. It also offers a full-color display ideal for viewing album artwork and playing slideshows — letting you carry as many as 25,000 photos in your pocket. Weighing just 6 ounces, 65% smaller than a CD and just 0.69" thick, the original iPod changed the way you listen to music by putting thousands of songs in your pocket. Now it changes the way you see your music. With a crisp color screen, browse playlists via vivid menus, thumb through album cover art, even play games and view calendars in color. Or sync photos and view them in color, anywhere. iPod lets you play your music for up to 15 hours on a single battery charge. When it's time to recharge just plug it into your computer or a handy wall socket (via the supplied power adapter) and it fast-charges in as little as two hours. Available in a huge 20GB or 60GB hard drive. Do the math: that's space enough to store four weeks of music — played continuously, 24/7 — or one new song a day for the next 30 years.

iPod / iPod NANO

Audio Support

- ◆ Designed to give you the best portable digital music, the iPod and iPod nano deliver the highest sound quality from input to output. Popular audio formats including MP3 (up to 320 kbps), MP3 Variable Bit Rate (VBR) and WAV are supported.
- ◆ They are also the only portable digital music players to support the AAC format (Mac-only), which features CD-quality audio in smaller file sizes than MP3, so you can fit even more songs on your iPod.
- ◆ In addition to the flash memory or hard drive, they have a memory cache buffer. Since it is solid state, there are no moving parts, so movement does not affect it. The memory pre-loads up to 25 minutes of music to the cache at a time, and they play the music from the cache to ensure completely skip-free playback

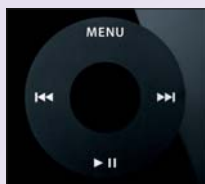

Power

- ◆ iPod and iPod nano let you play your music for up to 15 hours on a single battery charge. Imagine, you could fly from New York to Paris and still have hours of listening time left as you stroll the Champs Élysées. While you're on the move, they keep you aware of their charge level, and when it's time, they are quick to recharge.
- ◆ Plug them into your computer and they can be fast-charged to 80% capacity in 1-1/2 hours or three hours respectively. The iPod can be plugged into a handy wall socket via the supplied AC power adapter)

Sync

- ◆ The iPod and iPod nano are designed for listening to digital music away from your computer, and one simple connection does it all. Simply connect them to your Mac or PC and sync files via the high-speed USB 2.0 interface with the supplied USB cable. (The iPod can also sync via FireWire 400). The result? Blazingly fast transfer speeds that let you load an album in just 5 seconds.
- ◆ Using the optional Docks makes charging and syncing easier than ever. An elegant, convenient home base for iPod or iPod nano on a desk or connected to a home stereo system, the optional Docks provide syncing, charging and audio line out for connecting to powered speakers or a stereo system.

CLICK WHEEL

- ◆ They incorporate the touch-sensitive Click Wheel made famous by the iPod Mini. Without lifting your thumb from the wheel, you can use it to navigate your music on the 1.5" (176 x 132) or 2" (220 x 176-pixel) color LCD display. Spin the wheel to scroll effortlessly through dozens of playlists, hundreds of albums or thousands of songs and podcasts and start the music playing.
- ◆ Click Wheel puts music under your thumb. Click to fast-forward, rewind, play, pause or access menus. Use the touch-sensitive surface to control volume or browse music. You can do it all without looking.
- ◆ Or highlight photos. They hold up to 25,000 photos you can sync from your Mac or Windows PC via iTunes. (Optional accessories allow you to download digital images right from your digital camera or memory card to the iPod). The iPod displays 25 full-color thumbnails at a time in a 5x5 grid; the iPod nano displays 12 at a time in a 4x3 grid. Use the Click Wheel to scroll through photo thumbnails the same way you scroll through song titles. To see a photo full-screen, click the center button. You can even view photo slideshows, complete with music. Just select Slideshow settings and choose the time between slides, the transition effect and the music.

iTunes

The perfect companion to the iPod family, iTunes lets you easily build and manage your digital audio collection. Browse the built-in iTunes Music Store for more than 1,000,000 songs, 11,000 audiobooks and 3,000 podcasts. Jazz, Pop or Hip Hop. Mystery, memoir or thriller. Comedy, news or politics. From reading to radio, the iTunes Music Store has it all. Download what you want, then sync everything — including full-color

album, audiobook and podcast art to your iPod via USB 2.0 or FireWire (iPod only). Even your photos come along, either via iTunes or the iPod Camera Connector (iPod only). Once you sync, everything appears on your iPod, so you can look or listen anytime, anywhere. As for the CDs you already own, iTunes makes it easy to transfer your favorite songs and albums. Just pop a CD into your Mac or PC and click the Import button. You can import music in a variety of formats, such as MP3 or AAC, and at whatever quality level you'd prefer. Choose Apple's AAC lossless encoder for sound quality indistinguishable from a CD at about half the original file size. And with USB 2.0 and FireWire support, you can transfer music from an entire CD to iPod in 10 seconds or less.

iTunes gives you the tools you need to burn perfect CDs. Each music track is labeled with its running time — a feature that comes in handy when you're assembling 700MB of music or making a 74-minute CD. And iTunes adds up the total time in your playlist, so you don't have to.

iPod & iPod nano

Conveniences

- ◆ Ever forgotten a doctor's appointment or wished you had a friend's address handy? Take your calendar and contacts with you. With support for Address Book and iCal on the Mac and Outlook or Outlook Express on the PC, plus industry-standard vCalendar and vCard files, iTunes syncs your calendars and contacts so you can access everything— names, addresses, phone numbers, email addresses— with a quick spin of the Click Wheel.
- ◆ You've got playlists. You've got to-do lists. And you can carry both with you on the iPod or iPod nano. The Notes Reader lets you take text-based information — such as news downloaded off the web, stock tips, your workout regimen, restaurant reviews, directions, even your shopping list — with you on your travels. Just transfer to-do lists to your iPod from your Mac or PC via the included USB 2.0 or optional FireWire cable.
- ◆ Want to doze to your favorite tunes? Sleep timer lets you fall asleep to music. And if you like to wake up to music or to the sound of an alarm clock, they are just as accommodating. You'll find settings for the alarm clock and sleep timer in the Extras menu.
- ◆ Navigate to Extras and you'll also find games: Music Quiz, Solitaire, Brick and Parachute, four popular games you can play anywhere
- ◆ Have a particular set of songs you want to hear? Que up as many songs as you like in a playlist while away from your computer.
- ◆ Everyone's favorite option for mixing things up—Shuffle Songs, randomly plays the songs in your music library. You'll never guess what's coming up next, so you're always surprised by startling juxtapositions, like a melodic Coldplay song hot on the heels of a Caballé aria.
- ◆ When inspiration strikes, feel free to rate songs or create playlists right from the iPod or iPod nano. To create an On-the-Go Playlist, select a song, press and hold the center button until the song flashes. To rate a song as it plays, click the center button until you reach the ratings screen. Scroll the Click Wheel to choose a star rating and press the center button to save. Save multiple lists. Your On-the-Go Playlists and song ratings even sync back to your computer.

PODCASTING

Want to listen to your favorite radio shows and audio programs anytime? Just subscribe to the podcasts you want and iTunes takes care of the rest. Updates occur automatically. New episodes appear like magic. Podcasts sync to your iPod as soon as you dock it and listen to your favorite shows anywhere.

Find your favorites from the Podcast Directory on the iTunes Music Store (over 15,000 Podcasts and counting) — shows from big names such as ABC News, ESPN, KCRW, WGBH and more. Subscribe free and presto— iTunes automatically downloads each new episode as it becomes available. Yes, every podcast on the iTunes Music Store is free.

Browse podcasts in 20 categories — from arts and entertainment to politics to comedy — complete with descriptive summaries and the podcast equivalent of album art. Once you find a podcast that piques your interest, just give it a listen. Not just a sample, mind you. You can listen to the entire podcast before you decide to subscribe.

Customize the what, where and when of podcasts on iTunes. Check for new podcast episodes hourly, daily, weekly or manually using the slick Update button. Automatically download every episode or just the most recent ones. Keep all your episodes, delete them after you play them or keep a specific number based on release date. iTunes automatically checks for updates and downloads them according to your preferences.

Customize menus, check capacity, change your language, change how the iPod or iPod nano sounds and more, all from the Settings menu. Click About to see how many songs are on stored and how much capacity you have left. Click Main Menu to select what items appear in your Main Menu. Or tweak the built-in EQ to suit your songs. Everything you need — from backlight timer to audiobook speed — appears in Settings.

AUDIO BOOKS

Check out the well-stocked library of best-selling audio-books — 11,000 titles and counting — on the iTunes Music Store. Want to learn to speak Spanish, German or Italian? Download the language lessons and learn them using your iPod. Listen to blockbuster novels, best-selling nonfiction and magazines. Enjoy nail-biting suspense, action-packed thrillers, gripping mysteries, side-splitting comedies, self-help books and more. With prices starting at just \$2.95 per title, it's easy to start building your own

library of audiobooks — a number of them available exclusively at the iTunes Music Store. Like the complete six-volume Harry Potter audiobook series for example.

- ◆ The store lets you listen to 90-second previews — high-quality 32 Kbps AAC files that have been optimized for spoken word content — as many times as you like.
- ◆ You can control the rate of speech when listening to audiobooks - speeding up or slowing down, as you desire. This gives more control to match the reading speed to factors like the listening environment and content.
- ◆ Both iTunes and iPod let you fast-forward or rewind through spoken content, and when you sync back and forth between your computer and iPod, each will keep track of where you last left off listening.

iPod & iPod nano

iPod vs. iPod nano

Besides the obvious difference in size and storage capabilities, there are some other subtle but important differences between the iPod nano and iPod 20GB and 60GB "Color" models as well.

iPod

- ◆ The iPod has a video output allowing photos to be displayed on a TV or projector. (The iPod nano can only display photos on its display). The iPod also supports the iPod Camera Connector or third-party solutions, so photos can be transferred from a digital camera or memory card. (The iPod nano only "loads" photos from a computer).
- ◆ If you meet with clients, attend lectures, conduct interviews or just like to capture your own voice memos ("Memo to self: pick up stamps"), iPod does double duty as a voice recorder.
- ◆ Just pull out your ear buds and plug in an optional microphone. The files automatically sync to your iTunes music library when you get back to your Mac, so you can easily listen to them. You could even use the iPod to interview someone and then use the recording as a voiceover in a documentary.

iPod nano

- ◆ In addition to the calendar, contacts, and notes software on the iPod, the iPod nano includes additional software functionality, such as a "Screen Lock" security feature, a stopwatch, and a world clock.
- iPod nano's nifty World Clock lets you check the time, fall asleep to music and wake up to it, too. Open more than one clock to scroll between as many time zones as you choose. The clock faces even appear white or black to indicate day or night in different time zones.
- Screen Lock lets you use the Click Wheel to choose a four-digit combination and protect your iPod nano from prying eyes.
- Use the built-in stopwatch to log your best run times.
- ◆ Has an unplayed podcasts indicator (small dot appears next to podcasts you haven't listened to) and adds a Lyrics screen to the 'Now Playing' area, where you can view any lyrics added to the Lyric tab of a Song Information window within iTunes.

iPOD U2

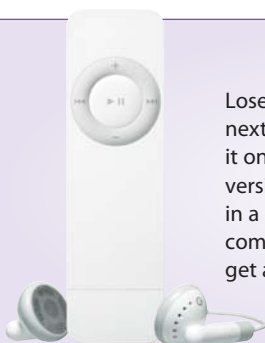

Like no other, iPod U2 Special Edition stands out. Jet black, it bears a prominent red Apple Click Wheel, a full-color display and, on the flip side, the autographs of each U2 band member. It comes with an exclusive U2 poster and, of course, the signature white iPod earbuds. As an extra special treat, it includes an iTunes Music Store coupon you can use to get \$50 off your purchase of "The Complete U2." As unique as the iPod itself, this digital boxed set brings together an amazing 400 U2 tracks. Songs span the band's celebrated career. From "Boy" to "War" to "The Joshua Tree" to "Zooropa" to the new "How to Dismantle an Atomic Bomb". It includes every U2 album, more than 100 rare live cuts, remixes, covers, demos, and b-sides; and 40 previously unreleased tracks. The set also packs a digital booklet (PDF) containing album art, track listings, and band commentary.

iPOD SHUFFLE

Lose control. iPod shuffle is the unpredictable iPod. What will it play next? Can it read your mind? Can it read your moods? Load it up. Put it on. See where it takes you. Choose from pocket-size 512MB or 1GB versions. iPod shuffle rejects routine by serving up your favorite songs in a different order every time. Just plug iPod shuffle into your computer's USB port, let iTunes Autofill it with up to 240 songs and get a new experience with every connection. iPod shuffle adds musical spontaneity to your life. Daily gridlock feels less mundane when you don't know what song will play next.

iPOD & IPOD NANO ACCESSORIES

Apple iPod AV Cable (APCAVIPP)

Provides composite video and audio output for viewing photo slide shows with music on a TV or monitor. The cable connects to the headphone port or the line out port on the iPod. Perfect for viewing slideshows from the iPod no matter where you take it.....**39.95**

Apple iPod Dock Connector to USB 2.0 Cable (repl.)

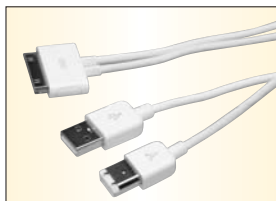

Use this cable for charging and syncing your iPod or iPod nano to your Mac or Windows PC. Supports either USB 1.1 or 2.0. APDCUIP.....**24.95**

Apple iPod Dock Connector to FireWire Cable

Use this cable for charging and syncing your iPod over FireWire. Compatible with iPod models with dock connector, except iPod nano. Firewire offers 400mbps throughput for quick transfer of your music and data to iPod. APDCFWCIP.....**18.95**

Apple iPod Dock Connector to FireWire and USB 2.0 Cable

Use this cable for charging and syncing your iPod to your Mac or Windows PC. Connect the FireWire cable up to the iPod power adapter to charge while syncing.

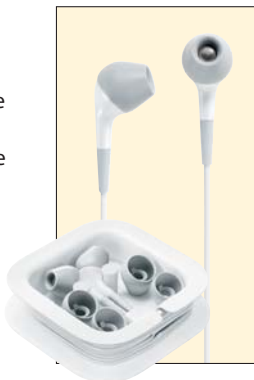

APDCFWUCIP.....**18.95**

Apple iPod In-Ear Headphones

These headphones have great sound quality and bass response, and come with three different sized caps to ensure the headphones fit comfortably and securely in your ear. Compatible with all iPod models.

APIEHPIP.....**38.95**

Apple iPod Dock (APDIPOQ)

The iPod Dock makes charging, syncing, and watching photo slideshows on your TV easier than ever. A convenient and elegant home base for iPod, the dock provides charging and syncing via FireWire or USB 2.0. This Dock also has an audio output and an S-Video connector for enhanced clarity when viewing photo slide shows on a TV.....**39.00**

Apple iPod nano Dock (MA072G/A)

The convenient iPod nano Dock is an elegant home base for charging and syncing with your computer or for connecting iPod nano to your home audio system. Like all iPod Docks, the iPod nano Dock enables quick connectivity if you have a desktop computer without an easily accessible USB 2.0 port. No more reaching behind the computer to plug it in — just place iPod nano in the dock and it's ready to sync with iTunes and charge its battery. And you can plug a stereo mini cable to its line-out port and enjoy a clean, direct connection to a stereo or powered speakers.....**29.00**

Apple iPod shuffle Dock (APDIPS)

The iPod shuffle Dock is an elegant home base for charging and syncing with your computer. Simply plug the dock into the USB port on your computer or the optional iPod USB Power Adapter to get started.....**24.95**

Provides a fast, easy way to transfer images from a digital camera to the iPod. Simply plug the connector into the iPod dock connector, plug in your camera's USB cable and watch your images make their way to the iPod.....**29.00**

Apple iPod Remote & Earphones (APREPIPQ)

Listening to your iPod on the go is even more convenient with this wired remote and high-quality earphones set. Compatible with all iPod models except the iPod shuffle.

- ◆ The earbud-style headphones rely on Neodymium transducers, a rare earth magnet that significantly enhances frequency response and overall sound quality - in fact, five times as powerful as other headphones that use aluminum, cobalt, or ceramic drivers.
- ◆ The wired remote lets you fast forward, rewind, play/pause, and control the volume with four simple buttons. The Hold switch allows you to lock your iPod remote so buttons can't be pressed accidentally. Clip the remote to your lapel, shirt, or collar for easy access.

iPod Remote & Earphone.....**38.95**

iPod & iPod nano ACCESSORIES

Apple iPod
FireWire Power Adapter

The FireWire based adapter allows you to charge your iPod when not connected to a computer. Just plug the adapter into a wall outlet and connect either a 6-pin FireWire cable (iPods without dock connectors) or an iPod Dock connector to FireWire cable (iPods with dock connectors) to your iPod for recharging. Ideal for home, office or travel.

M6836GC**35.00**

AppleCare
Protection Plan for iPod

Extend your Apple-certified hardware coverage and toll-free award-winning technical telephone support for up to two years.

- ◆ Provides expert support for both Mac and Windows users
- ◆ Covers iPod and accessories (iPod battery and iPod earphones)
- ◆ Supports iTunes and connection with iPod
- ◆ Guarantees genuine Apple replacement parts
- ◆ Permits transfer of the plan between owners

APACIP**58.95**

Apple iPod nano Armband

Arm yourself with the ultimate workout companion. Available in five sporty colors, this flexible, lightweight armband provides easy access to all iPod nano controls. Simply wrap the band around your arm or wrist and secure it with the adjustable fasteners. Then insert iPod nano — it slides right into its pocket and stays there. Now plug your headphones into the jack and press play. iPod nano's skip-free playback means you can run, ride, lift and more without missing a second of your favorite tunes. Comes in red, green, blue, pink or grey.

APABIPNG**29.00**

Apple iPod nano Tubes

Feeling a little blue today? Maybe your mood leans on the pink side. Either way, iPod nano Tubes have you covered. Constructed from smooth, treated silicone that resists dirt and stains, they come in a set of five colors: purple, pink, blue, green and clear. Just slip iPod nano in from the bottom or through the screen window to add a splash of flavor and deliver

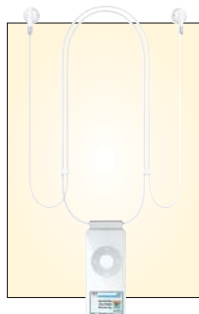

instant protection from scratches and bumps. You can still access the Click Wheel and hold switch.

MA241G/A**29.00**

Apple iPod Carrying Case with Belt Clip

Protect your iPod from the elements and enhance its portability with this custom-made carrying case. With precise stitching and high-quality woven nylon, the case allows you to clip your 20GB or 60GB iPod to your belt, purse, or backpack with its durable spring clip.

iPod Carrying Case with Belt Clip (APCIPZ)**27.95**

Apple iPod nano
Lanyard Headphones (MA093G/A)

Turn iPod nano into a stunning piece of wearable, musical art. The iPod nano is so small, it can fit just about anywhere. And it's so light, it can hang just about anywhere, too — including around your neck. Its ingenious built-in earbuds conquer clutter by integrating the audio signal with the lanyard itself, so you get a streamlined look without all the extra wire. Just plug the lanyard into the dock connector, put it around your neck and you're off**39.00**

AirPort Express Base Station with AirTunes

AirPort Express with AirTunes is an incredible wireless product that allows you to play iTunes music over your wireless network to your home stereo or powered speakers. It also allows you to share both a broadband Internet connection for up to 10 users and a USB printer. If you already have wireless at home, powered by an AirPort Express or AirPort Extreme Base Station, you can easily extend the range of your wireless network by connecting a second AirPort Express to it. AirPort Express has a small unique design made for life on the go. There are no separate power supplies or cables required, making it easy and convenient to take with you. AirPort Express is also designed to fully support both Mac and PC users.

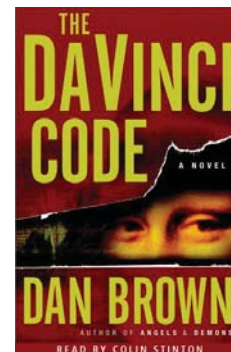

AirPort Express Base Station with AirTunes (APAE)**128.95**

DIGITAL AUDIO BOOKS

What is Audible? Audible is digital audio that goes where you do – to the gym, on your commute and beyond. Download and listen to over 28,000 audiobooks, radio programs, audio newspapers, magazines and more. Audible and Apple let you fit hundreds of hours of knowledge and entertainment in the palm of your hand and listen everywhere you go.

Learn Spanish while you walk the dog. Take in the day's headline news while you drive to work. Laugh along with a comic adventure while you workout. Listen to a bestseller while you relax on the beach. Hear a chilling mystery in front of the fireplace. Listen to best sellers by top authors like Dean Koontz, James Patterson, David Baldacci, Jonathan Kellerman, Mary Higgins Clark, audio magazines such as Forbes and Scientific American, audio newspapers including The New York Times and The Wall Street Journal, radio programs like This American Life and The National Lampoon Radio Hour, and lots more!

\$100 iPod Rebate

Purchase an Apple iPod, iPod nano or iPod shuffle and receive a \$100 coupon and use it to listen to bestselling digital audiobooks from Audible.com!

Join AudibleListener for 12 months and get any two digital audiobooks each month for one low price, and then apply the \$100 from B&H towards the subscription. Choose from more than 28,000 digital audiobooks and programs and listen anywhere you go. Offer exp. 1/31/2006

What is the AudibleListener membership?

AudibleListener is a monthly subscription program for people who love to read/listen and get a great deal:

BasicListener (\$14.95/month): Choose any one audiobook and one audio subscription each month.

PremiumListener: (\$21.95/month): A \$100 value! Choose any two audiobooks each month.

- ◆ If you want more titles than your membership provides, as a member you can purchase additional titles for 30% off the Audible price.
- ◆ Every title you select as part of your membership is yours to keep and will not timeout even after you stop your membership. If you delete a title from your computer, you can always come back to Audible and download it again, for free, as many times as you like!

RIPDIGITAL

Rip Your CD Collection into a Digital Music Library

RipDigital makes the move to digital music easy. Their primary service is converting CD collections into MP3 libraries — saving you from the laborious and time-consuming chore. RipDigital physically rips each of your CDs using industrial-strength hardware and software. Each CD is converted to 224kbs files to ensure CD-quality sound. The company returns your music library organized by artist and album with enhanced song information. The free CD-ripping software most people use can't compete in terms of sound quality and organization. RipDigital actively encourages responsible use of digital music by including unique and traceable information on each file that identifies the music as yours.

Step 1: You purchase a service contract for the amount of CDs you want to convert (50, 100, 200, etc.), into digital music. You will then receive a customer kit including spindles to hold your CDs along with protective padding, a prepaid FedEx return label and packing tape.

You're almost ready to enjoy your perfectly portable, easily sortable digital music library. RipDigital will deliver your digital music library on data DVDs for easy transfer onto your computer. But before you check out, you can specify if you want to purchase a portable hard drive preloaded with your music, in addition to the DVDs included in your package.

Step 2: Choose from a range of FedEx services to ship your CDs to RipDigital. Then simply load your CDs onto the spindles, seal the box and call FedEx for pickup. RipDigital insures all FedEx shipments for \$10 per CD.

Step 3: RipDigital will return your new digital music library via FedEx, along with your original CDs. You are now ready to enjoy your perfectly portable, easily sortable digital music library. RipDigital fulfills a 200-CD order within seven business days of receiving your CDs and larger orders within ten business days of receiving your CDs, not including shipping time.

For 50 CDs (RICDCSK50)	\$59.95	For 100 CDs (RICDCSK100)	\$119.95

**Mobile Power Cord for
iPod with Dock Connector**

Connects the iPod to your car's power source and provides unlimited

play and standby time. A replaceable safety fuse protects from potentially damaging spikes or short circuits. When used with the TuneCast II Mobile FM Transmitter you can power your FM Transmitter while on the road and preserve battery life.

Mobile Power Cord (F8V7067APL)19.95

TuneBase for iPod shuffle

Holder features an innovative, flexible neck that easily positions your iPod shuffle for your comfort, convenience, and safety while driving. TuneBase works through any cigarette-lighter outlet within the car.

While mounted, TuneBase simultaneously powers and charges the iPod shuffle.

TuneBase also features a 3.5mm line-out for use with a cassette adapter (included) for high-quality audio

TuneBase (F8Z039)39.99

TuneCast II Mobile FM Transmitter

Now you can use your iPod, PDA, MP3, CD, PC or laptop to listen to your favorite tunes through any FM stereo receiver. Using using FM radio waves, the TuneCast II Mobile FM Transmitter wirelessly connects portable music players to your car or home stereo. Simply plug the TuneCast II into the headphone jack of your audio device or computer. Tune your car stereo or receiver to any clear FM frequency, and enjoy your iPod music experience with more sound and fewer wires.

Convenient Auto ON/OFF function powers up TuneCast II when an audio signal is detected. If no signal is detected for 60 seconds, it switches off. 4 programmable memory slots allow you to save the clearest station wherever you go. It includes a 14" cable that delivers power when used with the Belkin Mobile Power Cord for iPod, so that you can preserve your batteries for times when you are away from an alternate source.

TuneCast II Mobile FM Transmitter (BET2MFMTIPQ).....39.95

**TuneStage for iPod**

TuneStage delivers a pristine high-quality sound through a high-end, home stereo environment using Bluetooth technology. TuneStage turns your iPod into a premier wireless remote allowing you to wirelessly stream digital music from up to 33' away from your stereo, free of the barriers that limit traditional remotes—such as walls, ceilings, or windows. Roam and play your tunes, from virtually anywhere in your home. And since the unit draws power directly from the iPod, it needs no batteries or extra cables.

- ◆ Requires no software—ready to use right out of the box
- ◆ Manually power on/off the TuneStage receiver
- ◆ Indicates proper connection and activity

- ◆ Includes a Gold Series 3.5mm-to-2 RCA stereo cable for plug-and-play convenience
- ◆ Connects to your home stereo via 3.5mm audio or RCA stereo outputs

TuneStage (F8Z901)132.99

Cassette Adapter for iPod

A great way to listen to your iPod or other portable audio device, this adapter plugs your portables into your car's in-dash cassette player to deliver high-quality sound on the road—anywhere you go. The Adapter reduces noise by automatically maintaining the correct tension within the cassette deck as you drive, so you get an outstanding mobile audio performance. Includes a 3.5mm connector and allows easy placement of your audio player with 4' cable.

Cassette Adapter for iPod (BEMP3AIP)14.99

Hi-Speed USB 2.0 4-Port Hub

Provides four downstream USB ports that are compatible with both high-speed USB 2.0 and USB 1.1 (low- and full-speed) devices. The top loading port gives you easy access for quick, temporary connections of USB thumb drives, media readers, small accessories, the iPod shuffle, and more.

Hi-Speed USB 2.0 4-Port Hub (BE4PUH).....39.95

Digital Camera Link for iPod with Dock Connector

Now you can leave your PC at home and stop worrying about using up your camera's memory. Media Reader for iPod with Dock Connector

Now store more than tunes. Belkin's innovative Media Reader for iPod gives you a great way to back up digital images to your iPod, and take them with you on the road. Your iPod's abundant storage handles thousands of digital photos and frees up your camera's disk space so you can take more pictures.

◆ Transfers digital photos via FireWire at 300KBps

◆ LEDs indicate power and data transfer status

◆ Protects the media slots from pocket dust and dirt with sliding port

◆ Supports CompactFlash, SmartMedia, SD (Secure Digital), Memory Stick, MultiMediaCard (MMC)

Media Reader for iPod with Dock Connector (BEMRIP)49.95

Battery Pack for iPod with Dock Connector

The Backup Battery Pack keeps the music playing when the internal battery is drained. A great solution for long flights, hikes, or for anytime you don't have access to an AC outlet, the Battery Pack uses four "AA" alkaline batteries to provide up to 15 hours of battery life. Discreet suction cups secure the unit, without marring your iPod's finish. In addition, a 4-LED charge-level indicator lets you know when the batteries are running low. Not compatible with iPod mini.

Battery Pack for iPod with Dock Connector (BEBBUIP)39.99

TunePower Rechargeable Battery Pack for iPod

TunePower keeps the music playing by powering your iPod when the internal battery is drained. Ideal for long flights, hikes, or for anytime you don't have access to an AC outlet. TunePower provides 8-10 hours of additional power via a rechargeable 2-cell Lithium-ion battery. For convenience it has a power-level indicator, so you can tell when your batteries are running low, and it includes 3 sleeves sized to fit all iPod and iPod mini players with dock connector. With a compact design, TunePower easily fits in your pocket or carrying case

◆ TunePower includes a DC/FireWire Charging Cable that charges both your iPod and TunePower simultaneously when used with the Apple iPod AC power brick or any laptop or PC with a FireWire port.

TunePower Rechargeable Battery Pack for iPod (BETPBIPM)79.95

iPod Accessories

TuneDok Car Holder (BETDCHIP)14.99

iPod Accessories

VoiceNote

VoiceNote is a voice recorder for iPod that lets you record meetings, lectures, ideas, conversations, or whatever you want

through its built-in mic or external lapel microphone—both included.

- ◆ The external lapel mic provides crystal clear recording capability. Level settings can be adjusted on the iPod, allowing you to optimize the quality of your recordings.
- ◆ Recordings are played back through the built-in speaker or they can be downloaded to your computer. There is no software installation required—just plug it into your iPod and you are ready to record.

VoiceNote (DLVRIP)29.95

iDirect

iDirect is a remote control for iPod that lets you manage your

iPod with ease, no strings attached!

- ◆ Manage iPod with ease, advance through playlists, adjust volume output and power iPod up or down from across the room.
- ◆ The perfect companion for the iPod as entertainer - no need to stop the music and mess with the iPod's controls.
- ◆ Great for workouts and other activities. The easy interface 5-button remote allows you to scroll through your music without having to stop what you're doing.
- ◆ Contains two pieces - a pocket size remote control with play/pause, track advance and volume control, and an IR receiver that snaps on top of your iPod.
- ◆ iDirect fits all docking iPods, including the 20GB, 40GB, U2 iPod, iPod photo and iPod mini.
- ◆ Already own a Universal remote? The iDirect uses standard iR for its remote signal, so your Universal Learning Remote can memorize iDirect's commands and control your iPod with its advanced features and macros.

iDirect (DLRIP)29.99

iBoom

Take your music anywhere. Share your iPod with your friends. Get your iPod party started with the iBoom, the first boombox for iPod. It's your iPod out loud in big stereo sound, outside, at home, anywhere.

- ◆ Specifically designed for iPod and iPod mini, iBoom is a 20-watt per channel, four-speaker boombox system with built-in digital FM radio. Simply drop iPod or iPod mini into the iBoom dock, hit play and enjoy the music.

- ◆ iBoom also features a built-in handle for ease of portability, auxiliary input jack, and can be powered via its included AC adapter or with 6 D-size batteries (not included). While under AC power, iBoom extends the battery life as it powers and charges the iPod.

iBoom Four-Speaker Boombox System (DLIBIP)89.95

HomeDock

Finally a home for your iPod – at home. With HomeDock, you can easily connect and enjoy your iPod's music through your stereo and TV. A true home entertainment, HomeDock includes a 14-function remote control to play your tunes from across the room; and an AC plug to power and charge your iPod while docked. It even allows you to connect the iPod without removing it from its case.

- ◆ iPod sounds great through earbuds, travel speakers or a boombox. But hook it up to a high-fidelity home stereo system, and you'll be amazed by how good it sounds.
- ◆ HomeDock connects the iPod to your stereo via RCA type plugs and cables (included). Simply dock your iPod and music is sent to your amplifier through the superior audio line-out from the bottom of the iPod. No adapters or loose cables.
- ◆ HomeDock also has a USB interface that connects to your computer and lets you sync and charge your iPod from HomeDock.
- ◆ HomeDock also connects to your TV via composite or S-Video so you can show all those pictures trapped inside iPod. Just dock your iPod, select a photo slideshow and relive the memories all over again. Control the show from the comfort of the couch with the included remote control.
- ◆ USB powers HomeDock so you don't have to plug it in when attached to your computer. Play iPods music through a pair of powered speakers or passed back through the input of your PC. What you'll have is a convenient, great sounding iPod office stereo system.

TransPod

Go mobile in style! The wireless TransPod allows you to listen to your iPod through your car radio. It broadcasts your iPod's music clearly over your car stereo with the most powerful FM transmitter made for the iPod, and tunes to any FM frequency, from 87.9-107.9. (It also has 4-preset stations that let you jump to commonly used frequencies). Simply plug the TransPod into any car power adapter and transmit your iPod's music to an empty radio station - while you keep your iPod charged at the same time - all in one compact unit.

The TransPod fits both iPod and iPod mini, and includes an adjustable mounting arm that allows you to position the iPod for easy access and control. You change frequencies via a simple button on the side of the TransPod. It also features a line out function that lets you plug directly into your car stereo via a cassette adapter or auxiliary plug.

TransPod All-In-One Car Solution (DLTAIOFMT) 84.95

iPod Accessories

AutoPod

Keep your iPod, iPod nano or iPod mini fully charged in style with the AutoPod Car Charger. It includes stylish curves, a transparent status light lens and glass finish. A choice of white or black finishes allows you to match either the iPod color or the darker interior of your car.

- ◆ Charges the iPod's battery from any 12v cigarette lighter outlet. Comes with a 24" coiled cord that stretches to over 5' in length.
- ◆ Charger status light shows you charging condition at a glance - viewable through the clear lens in the charger module.
- ◆ Fits all dockable iPods including. It includes Velcro tabs that allow you to mount the ultra-light iPod nano, connected to your AutoPod, anywhere you want in your car.

Available in White (DLAAW) and Black (DLAAW) ...**29.95**

TransPod Direct

TransPod Direct is an all-in-one car solution for iPod and iPod mini. It comes with a built-in charger for the iPod, a cradle to position it for easy access to its controls, a cassette adapter and a mini plug cable. Most importantly, it provides you with a direct connection to your car stereo that integrates the high-quality line-out audio signal from the bottom of the iPod. It's the next best thing to a full custom install.

- ◆ The best sound output available from an iPod comes from the 30-pin port on the bottom of the player. Merely connecting from the headphone jack at the top of the iPod with a cassette adapter or mini cable won't achieve this level of sound quality. TransPod Direct connects directly to the line output in the bottom dock connector. You can then plug in either the included auxiliary mini cable or cassette adapter to the jack on the side of Transpod Direct to connect to your car stereo.
- ◆ TransPod Direct mounts your iPod so that you have easy access to its screen while it simultaneously keeps iPod charged. The 360° rotating base arm provides you with your ideal viewing position in any vehicle.
- ◆ Simply plug in either the auxiliary m/m cable or the connecting cassette into the aux jack on the side of Transpod Direct. Insert either cassette adapter or auxiliary cable into your car stereo and you're ready to go!

TransPod Direct: Available in White (DLTCMW), Silver (DLTCMS), and Black (DLTCMB).....**69.95**

Tivoli Audio iSongBook

Portable iPod Music System

The iPod is the best portable music player on the market. So who better than Tivoli Audio, makers of the world's finest radios, to produce the best portable music system for the iPod. The best companion ever made for an iPod user, iSongBook turns an iPod into a full-bodied music system with the same full and rich sound you've come to expect from Tivoli Audio— in a portable system. Specifically made for the iPod, the flip-down docking station will fit all iPod models and recharges the iPod when docked. The supplied remote control operates both the iPod and the iSongBook.

- ◆ White with silver faceplate makes the iSongBook a perfect match for the iPod.
- ◆ iSongBook features a highly sensitive digital AM/FM tuner for clear and precise reception with a 9k/10k switch for AM reception outside North America, as well as an adjustable, telescoping FM antenna and built-in AM antenna.
- ◆ Stations may be tuned manually or via 5 AM and 5 FM favorite station preset buttons with a "seek" function to search for signals in any country.
- ◆ "On demand" blue backlit LCD display shows the station tuning as well as the digital clock, whose functions include alarm and 20-minute sleep timer that can be set to wake to an iPod as well as radio.
- ◆ Includes a detachable matching secondary speaker for expansive stereo sound, and a 6' audio cable for proper room positioning with rewind mechanism, and optional carry bag.
- ◆ Credit card sized remote controls the iSongBook and the iPod when docked.
- ◆ Auxiliary input and stereo headphone output are positioned in the rear, complete with rubber covers to protect them from the elements when not in use.
- ◆ Operates on standard AA alkaline or NiMH/NiCad rechargeable batteries with the unit's built-in charger; or by an AC adapter or 12V power source.
- ◆ The iSongBook is sized to fit in a suitcase, briefcase, or backpack, measuring just 6³/₁₆ x 11¹/₁₆ x 2³/₁₆" (HWD) for the clock/radio with the slave speaker.

PowerPod

iPod Auto Charger

Same as the PowerJolt (above) except it includes a separate 4' high-quality Dock Connector to FireWire cable**19.99**

iTrip with LCD FM Transmitter for iPod

The coolest iPod accessory in the world, the iTrip FM transmitter played your music through any FM radio in your car, at a party, or at home. It gave you the cleanest possible signal - because you were able to choose any radio station on the dial to tune for the best performance possible. You did this by 'playing' special station codes directly from the iPod itself. That was then.....

Retaining the same phenomenal industrial design—visually and functionally complementing the iPod, the new iTrip builds on this with enhancements and features never seen before on FM transmitters.

- ◆ The iTrip has a large, easy-to-read backlit LCD screen, so setting its digital tuner is easy and intuitive. A handy knob on the side of the makes it a breeze to select broadcast frequency: simply turn to the frequency and click the knob to set it. The iTrip remembers its settings for convenience. Compact, self-contained design makes changing stations a snap, perfect for use on the go.
- ◆ Selectable LX or DX modes of broadcasting (an FM transmitter first) lets you to adjust for the absolute best possible audio under real-world conditions. Even in tough situations, such as large cities with lots of radio stations crowding the dial, iTrip's DX Mode delivers a noise level that's below that of a cassette tape adapter, allowing the music to punch through cleanly. The results are stunning.
- ◆ Another FM transmitter first is the ability to set the iTrip to either US or International tuning modes. International mode allows access to all available frequencies throughout the world. US mode limits tuning to those frequencies relevant to US stations. The result: no unnecessary scrolling through channels.
- ◆ Auto volume control now works with the iPod's volume level to automatically avoid distortion. If the iPod volume is set too high, iTrip recognizes and corrects it by lowering the volume to its optimum level, assuring clean, clear, dynamic sound.
- ◆ Still doesn't need batteries, it receives its tiny amount of power from the iPod, and it can rotate out of the way to charge the iPod while still in use.

SmartDeck

Intelligent Cassette Adapter for iPod

SmartDeck allows you to control your iPod using the controls of your cassette player. Using patent-pending sensing technology, the SmartDeck determines which commands the cassette player sends to the iPod.

SmartDeck is more than just a cassette adapter for iPod; it achieves truly seamless integration between iPod and cassette deck. Use the deck's FF and REW buttons to advance to the next or prior songs in the iPod playlist. Pause and stop buttons do what pause and stop buttons are expected to do. Hit the Eject button or switch from cassette to radio, and it automatically pauses the iPod**29.95**

AirClick Remote Control for iPod

AirClick for iPod and iPod mini is the remote control you've been missing. It lets you hook up your iPod to your sound system and wander through the house while in full control of your tunes. Pause your iPod to answer the door and then crank it up without even going in the room.

AirClick uses RF signals that travel through walls for control anywhere in your home or outside, up to 60' away. The five button remote allows for play/pause, next track, previous track, and volume up and down. A hold switch on the side prevents accidentally disturbing your musical nirvana. The remote has a clip on it for convenient attachment. Also has convenient remote holder with velcro straps to allow attachment as an armband or to a bicycle frame or steering wheel.....**29.95**

BlueTrip Wireless Bluetooth Audio for iPod

BlueTrip delivers the pristine CD-quality sound that iPod users want in a high-quality home stereo environment. Using Bluetooth technology, BlueTrip can transmit up to 30-feet away from your stereo, without the traditional barriers of line of sight, walls, ceilings or windows that limit other remotes. With BlueTrip, you are free to roam and jam.

Your iPod equipped with BlueTrip effectively becomes the ultimate remote, with every control at your fingertips, and any song at your whim. BlueTrip draws its power directly from the iPod — no batteries or extra cables required.

The BlueTrip receiver's stylish design makes it a welcome addition to any entertainment center. With RCA plugs as well as optical and headphone output, it can integrate into any stereo configuration**139.95**

RoadTrip

FM Transmitter/Charger/Cradle for iPod/iPod Mini

The only iPod and iPod mini car accessory you'll ever need, RoadTrip is a high-powered FM Transmitter, iPod auto charger AND a convenient iPod cradle. RoadTrip plugs into any auto power outlet or lighter adapter and provides an adjustable cradle to charge and hold any docking iPod.

The transmitter can then be set to broadcast iPod's music to any FM frequency from 88.1 to 107.9. Its backlit screen shows which frequency RoadTrip is currently broadcasting and can easily be adjusted via buttons located directly on the front of the unit.

Audio is transmitted through the connected dock on the bottom of iPod. This leaves the top of the iPod open for use with other accessories. For added versatility, the removable FM transmitter module can also be used to broadcast music from a Mac or PC. Attaches to a USB-equipped computer via a combination USB power/audio connector cable (included). This allows you to play iTunes music to any FM stereo close by**69.95**

iPod Accessories

Dock400 • Dock800

FireWire Cables for iPod

The Dock400 FireWire cable allows you to connect your iPod to a Mac or PC's Firewire port, for charging and file transfers. The Dock400 cable is 48" long and uses Apple-approved connectors. It can be used with Apple's iPod dock, or plugged directly into the iPod. Short on FireWire connections? Have to unplug something everytime you want to sync your iPod? Let a Dock800 cable ease your load. Using the Dock800 cable is a smart way to use your FireWire ports. Grab one and give your iPod a unique connection to your computer.

- ◆ Deliver massive bass and improved sound
- ◆ Enhance the comfort and fit of your earbuds
- ◆ Raises your earbud volume by up to 10 dB
- ◆ Includes multiple size ear pads and a great carrying case to protect your spare earpads and your Earbuds.

EarJams9.99

iTalk

iPod Voice Recorder

Make your iPod much more than just an MP3 player. Make it a portable, dockable dictation machine with a built-in high-quality speaker. Plug iTalk into the top of your iPod and you have a world-class voice recorder with literally thousands of hours of recording time.

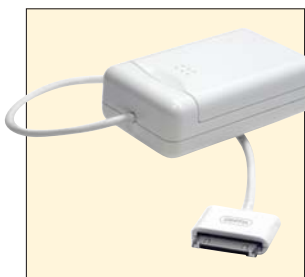

Record seminars, meetings, classes, notes in your car, songs, whatever you want. iTalk has a built-in microphone designed to record crystal-clear audio, and its Automatic Gain Control (AGC) assures you have the best possible signal level for recording. You can even connect an external microphone directly to iTalk for more recording options.

The iTalk's built-in speaker is great for playback of voice memos. In addition you can use iTalk as a mini-speaker for your iPod. You'll never realize how much you've missed a built-in speaker until you have one. iTalk plays back your recordings through its integrated speaker, or through your headphones. It includes a pass-through minijack so you can monitor your voice recording or listen to music without removing iTalk. You can even download your recordings to play back on your computer**29.95**

TuneJuice

Battery Backup for iPod and iPod mini

Ever run out of iPod battery without a power source in sight? TuneJuice is perfect for those times when you just gotta have more than what your iPod battery can give you.

Powered by a standard 9-volt battery, TuneJuice works with any dockable iPod or iPod mini. If your iPod has some charge, TuneJuice will provide up to 8 hours of additional play; a completely drained iPod will get up to 4 hours. Pop another 9v battery in and keep rocking. The perfect carry-on for airplanes, road trips and ski trips. Anytime you need some serious play time and don't have access to AC.....**14.99**

iBeams

Laser Pointer and Flashlight for iPod and iPod mini

You tote your iPod everywhere, right? If you're like us, your iPod is always close at hand, ready for some tunes or to take a voice memo. Now your iPod has another cool new trick.

iBeams is a snap-on flashlight that is surprisingly functional when a quick beam of light is required in a dark car or doorstep. The other half of the package is a class IIIA laser pointer. Handy for iPod-friendly presentations, the laser pointer is an amazingly powerful red laser beam that is

capable of being seen over a quarter of a mile away. Both units come with a snap-on protective cap that can be attached to any keychain for convenient portability and accessibility**15.99**

iSqueeze

Cradle for iPod or iPod mini

Put your iPod in the lap of luxury. Your cup holder is a great place for your iPod on the road, but it can still slide around, fall out, and even be scratched. And trying to use a charging cable really complicates things.

Enter the iSqueeze. iSqueeze holds your iPod or iPod mini at an easy-to-see angle. The material won't scratch the iPod's surface, and isn't going to fall out. The iSqueeze also leaves room on the inside for a docking cable, and provides a place for the cable to run without disturbing your iPod's newfound peace**9.99**

Chameleon

Next Level iPod mini Cases

Chameleon cases for iPod mini are unlike anything you've ever seen before. Through a new process, full color artwork is

integrated into the polyvinyl Chameleon case, with stunning results. There is no comparison between Chameleon cases and the thin sticker products currently available. Now there is no need to compromise between great looks or protection—Chameleon offers both. Chameleon cases are made of a sturdy dense polyvinyl material, much tougher than regular silicone cases. Inside a Chameleon case, your iPod mini is shielded from the rigors of every day life. The front control wheel is completely protected and fully functional.

- ◆ Tough rubber form fitting case provides ultimate protection
- ◆ Includes belt clip dock for easy on/off access
- ◆ Included 21" lanyard
- ◆ Available in exceptional designs like you've never seen before

Chameleon 12.99

iPod shuffle Accessories

TuneBox Speaker System for the iPod shuffle

Plug the iPod shuffle into the docking connector between TuneBox's twin speakers for instant gratification. TuneBox charges your shuffle's battery while it's playing. TuneBox's micro drivers and efficient amplified speakers generate a powerful, dynamic sound, with unexpected clarity and great highs and lows.

TuneBox keeps the shuffle's clickwheel controls up front within easy reach. Though it's designed to visually complement the iPod shuffle, TuneBox delivers great sound from any MP3 player or other audio device that uses a 3.5mm stereo jack.

With a space investment of less than 4 square inches, TuneBox delivers impressive sound and functionality.

- ◆ Total power output of 2+2 watts for amazing power and volume
- ◆ Stylish design complements Apple's award-winning industrial design
- ◆ Functional design keeps shuffle controls handy
- ◆ Slim design AC adapter fits easily on crowded power strips or wall outlets
- ◆ DC power cable for use in office or home
- ◆ Dimensions are 4.3 x 2.4 x 4.4" (WDH)
- ◆ Input: 100-240v AC 50/60 Hz; Output: 12v DC

TuneBox Speaker System (TUNEBOX) 34.95

iVault

Armor for the iPod Shuffle

Griffin Technology, in collaboration with designer Greg Gutierrez, has created a stunning enclosure that incorporates maximum protection in an elegant design. Machined entirely out of aluminum, the iVault safely encloses your iPod shuffle, while still allowing total access to the control wheel, audio jack, on switch, USB port, and LED. The front and back halves of the case are joined together by 4 small screws, so your iPod shuffle is guaranteed to be secure. Every edge of the iVault is rounded and beveled for the perfect feel. You won't want to put it down. Lightweight yet strong, the iVault and the iPod shuffle together weigh less than 1.5 ounces. Available in five distinctive colors: silver, blue, red, purple, and green 19.95

TuneCaps Pocket Clip, Keyring Cap and Wrist Lanyard for iPod shuffle

TuneCaps offers three options for keeping your shuffle conveniently close at hand. The TuneCaps solutions attach to your shuffle to let you carry it in any of three different ways:

- 1) Slip on TuneCaps' Wrist Strap cap for fingertip convenience.
- 2) Replace the shuffle's cap with TuneCaps' handy pocket clip and secure it to your pocket (or belt or necktie or whatever).
- 3) Slip on TuneCaps' keyring attachment and take your tunes with you while you drive.

TuneCaps (TUNECAPS) 9.99
